STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

ORDER

APPLICATION 14022

PERMIT 8820

LICENSE 4481

ORDER CORRECTING THE
DESCRIPTION OF THE PLACE OF USE

WHEREAS:

1. License 4481 was issued to Hallie Hyde Irwin, William Hyde Irwin, Edwin Gillette, Hyde Gillette, Helen Gillette Chapin and Marietta Gillette, and filed with the County Recorder of San Joaquin County on January 9, 1957.
2. License 4481 was subsequently assigned to Augusta-Bixler Farms, A Partnership.
3. It has been determined that the description of the place of use should be corrected. The correction is needed to correctly state the Range as 5E, rather than the current incorrect 5W.
4. The State Water Resources Control Board has determined that said correction in the description of the place of use will not initiate a new right nor operate to the injury of any other lawful user of the water and that good and sufficient cause has been shown for said correction.
5. License condition pertaining to the continuing authority of the Board should be updated to conform to Standard Permit Term 12 as contained in Section 780(a), Title 23, of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. A description of the lands or the place where such water is put to beneficial use is as follows:
 - 5.2 acres within Section 14, T1S, R5E, MDB&M
 - 3.4 acres within Section 15, T1S, R5E, MDB&M
 - 0.4 acre within Section 21, T1S, R5E, MDB&M
 - 455.4 acres within Section 22, T1S, R5E, MDB&M
 - 284.7 acres within Section 23, T1S, R5E, MDB&M
 - 3.0 acres within Section 24, T1S, R5E, MDB&M
 - 69.1 acres within Section 26, T1S, R5E, MDB&M
 - 278.0 acres within Section 27, T1S, R5E, MDB&M
 - 5.5 acres within Section 28, T1S, R5E, MDB&M
 - 1104.7 acres total, as shown on map on file with State Water Resources Control Board.

2. License condition relating to the Board's continuing authority be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
